The New Generation of 911 Emergency Response

We provide and integrate the leading web platform in the U.S. market that, in real-time, allows:

[More info](#)

Live Video

Possibility of accessing the care camera, with your consent, to have visibility of the emergency scene through a live broadcast.

Receive and send photos

The ability to send and receive images from the emergency scene, enabling storage in the emergency history for post-call analysis.

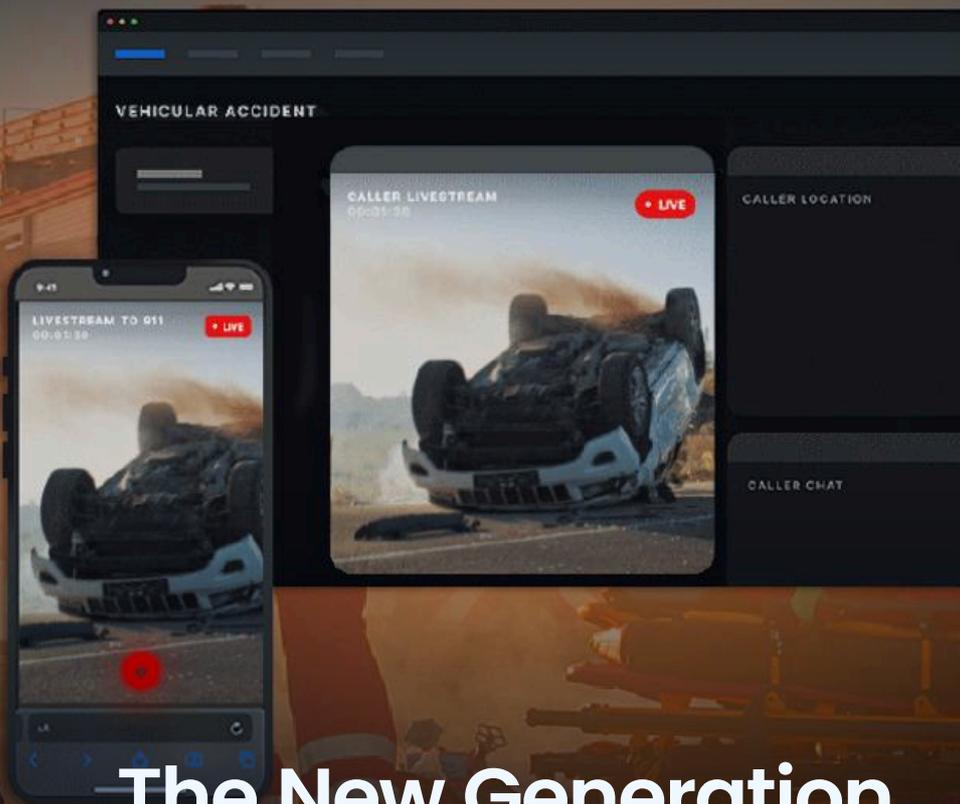

Instant Messages

Possibility of chatting with the agents who are responding to the emergency, with the ability to translate in real time, into more than +140 languages.

Location Monitors

The capability to have traceability of the caller's location during the emergency, providing dispatchers with specific knowledge of the emergency's exact location.

The New Generation of 911 Emergency Response

Currently operates in more than 600 911 dispatch centers
in the U.S., spanning 48 out of its 50 states.

[More info](#)

Manages around 250 million calls per year

Protects more than 75 million citizens

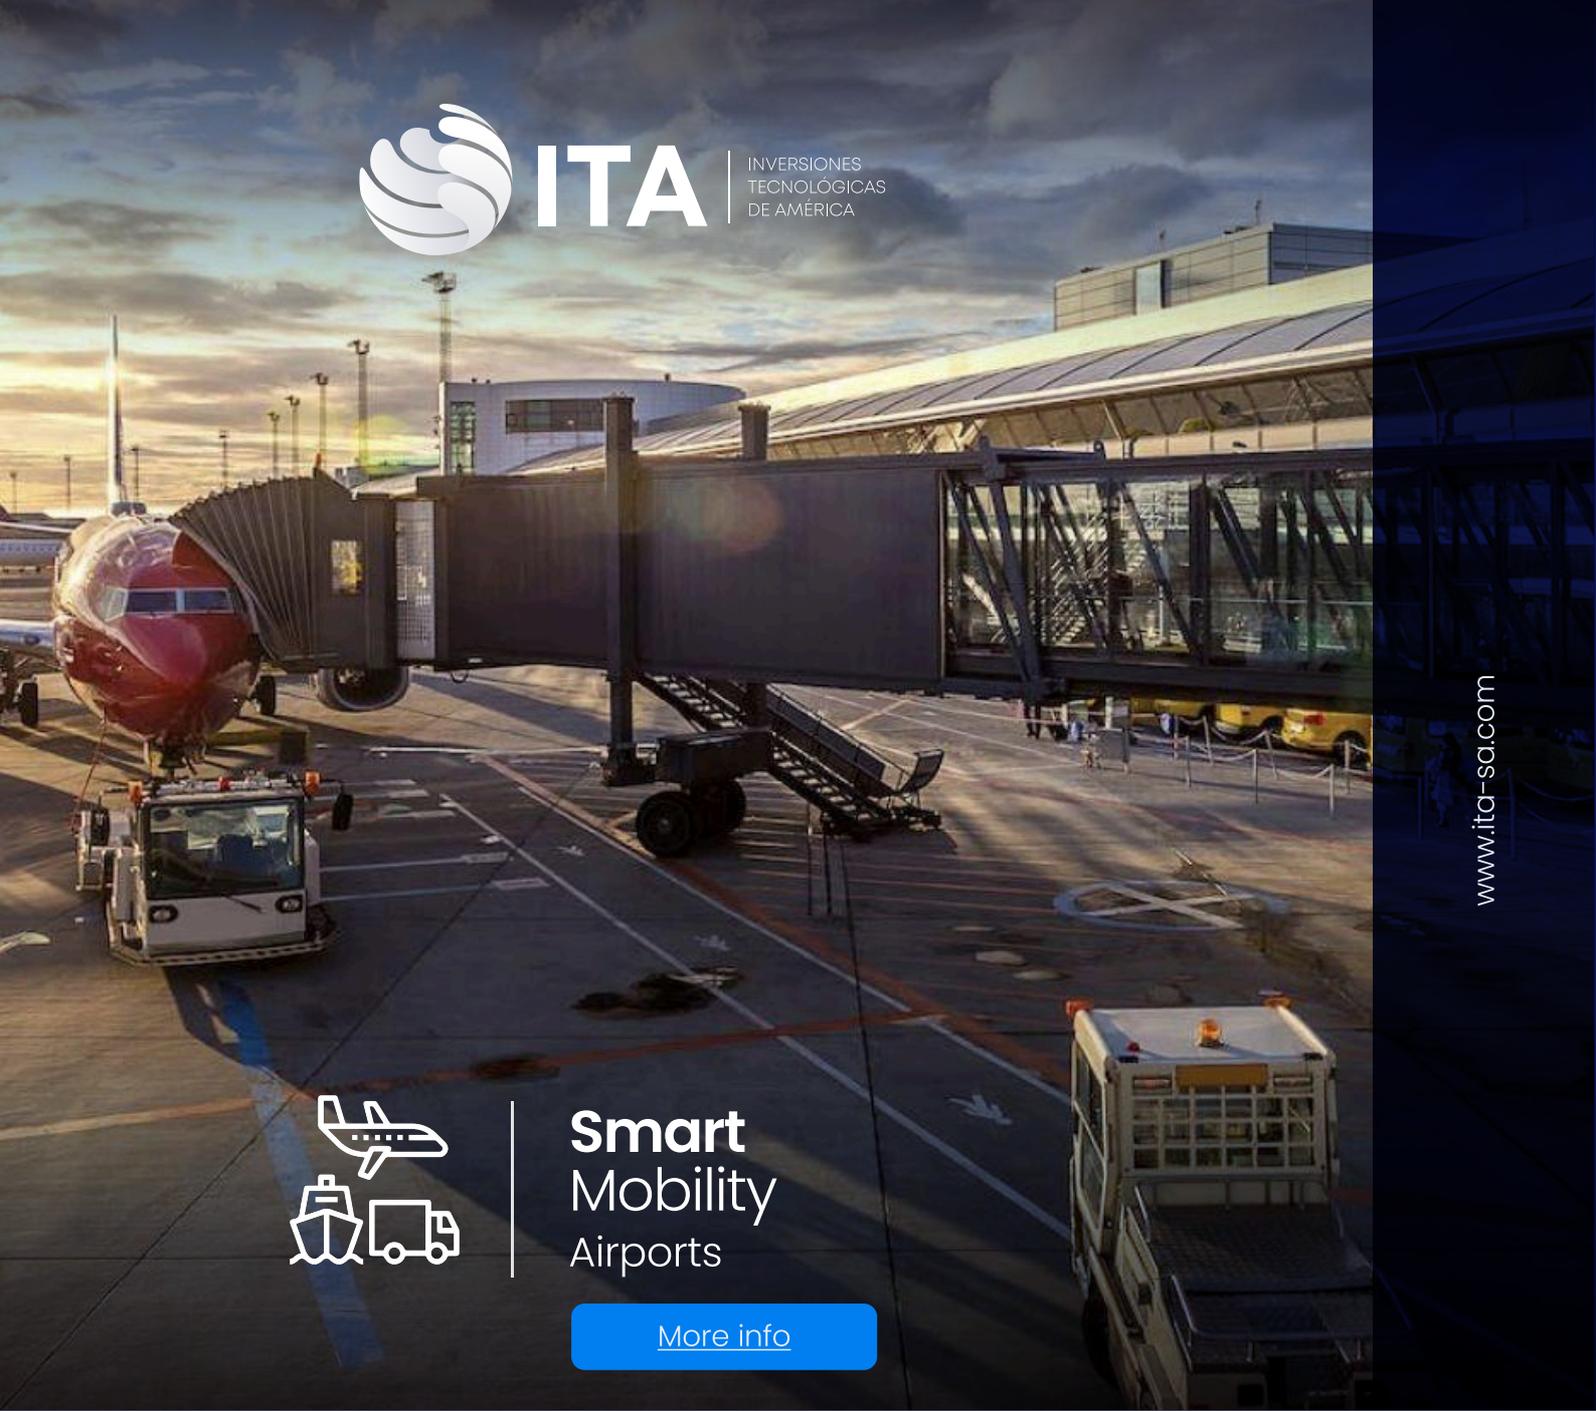

The technological infrastructure to provide these services is already available, thanks to smartphones.

The tool integrates Police, Emergency Medical Services, and Firefighters, among others.

It includes discretionary features for emergencies involving domestic violence or kidnappings, such as live video streaming and GPS location, while the screen of the emitting device appears as if it is turned off.
