**05** Hearing Indexing

## Judicial Management System

[Conocer más](#)

We offer Smart Judicial Management Systems through a comprehensive platform designed to optimize the administration and tracking of legal cases within judicial offices. Our system centralizes information, streamlines processes, enables detailed case monitoring, manages calendars, facilitates communication among stakeholders, and ensures the security of sensitive data.

## Virtual Hearing Rooms

[Conocer más](#)

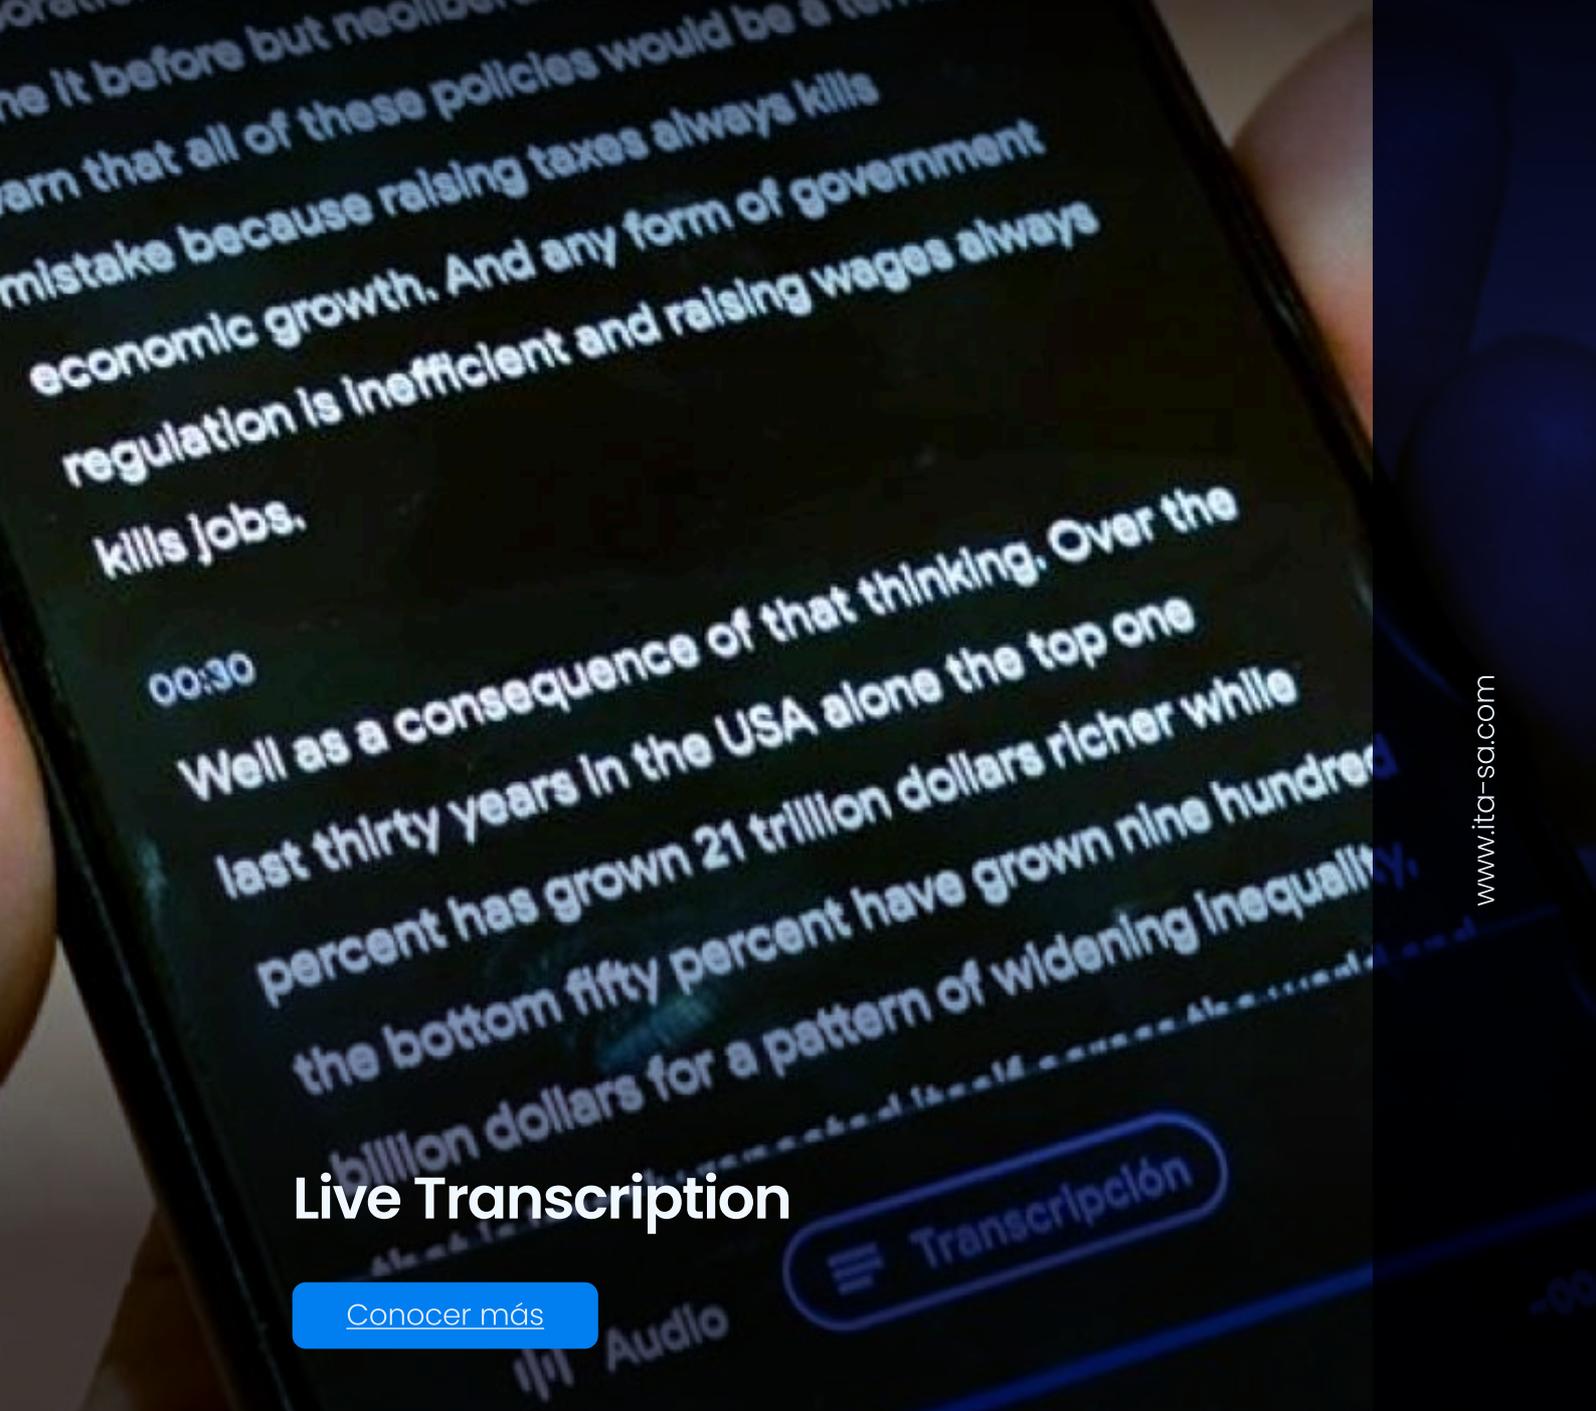

Our Virtual Hearing Rooms solution provides a secure and efficient platform for conducting judicial hearings online. With integrated tools for video conferencing, live streaming, document management, and annotations, we create a digital environment that replicates the in-person experience, allowing for the remote participation of all parties involved in legal proceedings.

## Court Hearing Digitalization Systems

[Conocer más](#)

We offer a hearing digitalization system that converts analog judicial proceedings into accessible, easy-to-manage digital formats. Our solution efficiently captures, stores, and organizes audio, video, and document records associated with hearings, allowing for rapid retrieval, search, and consultation at any time, from any device.

## Live Transcription

[Conocer más](#)

Our live transcription technology provides a precise and automated tool for the real-time generation of text transcripts during hearings. This solution streamlines the legal documentation process, providing accurate transcripts that can be reviewed and shared immediately, enhancing efficiency and precision in the record-keeping of judicial proceedings.

## Hearing Indexing

[Conocer más](#)

Our hearing indexing solution utilizes advanced algorithms to systematically tag and organize digital judicial records. This enables rapid search, retrieval, and referencing of specific information within archives, facilitating the location of relevant data for legal proceedings and streamlining decision-making.
