We are a GovTech company focused on creating, integrating, and scaling technological products and services throughout Latin America to execute strategic digital transformation initiatives in the public sector.

Our Mission

To harness the power of technology to transform and empower Latin American governments, building efficient, secure, and innovative societies for all citizens

Our Vision

To be the driving force behind digital transformation across Latin America's public sector, empowering governments to achieve excellence and efficiency while ultimately improving the lives of millions throughout the region.

01 Access Control Systems

Our security solutions offer comprehensive access control for restricted areas, alongside seamless management of passenger, luggage, and vehicle traffic at both air and land terminals.

03 PAS Solutions

We implement Public Address Systems for high-fidelity communication in waiting rooms, hallways, and other common areas. These systems ensure clear amplification of operational updates for air and land passenger traffic, including boarding calls, flight status, and routine guidance.

05 Self-Check-in Kiosks

We implement a wide range of self-service kiosks for real-time registration and check-in. Our solutions streamline passenger transit, reduce wait times, eliminate queues, and enhance the overall travel experience.

07 POS Monitoring Solution

We develop and implement hardware and software for the management and control of non-aeronautical revenue. Our solutions provide real-time tracking of commercial activity and purchases, alongside passenger forecasting and analytics to drive strategic decision-making.

02 X-Ray Systems

We provide security solutions through advanced screening equipment, featuring X-ray technology, walk-through metal detectors, and narcotics or explosives detection systems.

04 AOCC

AOCC (Airport Operation Control Center): We design and implement control centers for airports and land terminals to centralize and manage operations through Artificial Intelligence. Our systems streamline ground and air processes, including aircraft parking assignment, passenger and luggage management, and the integration of CCTV and HVAC subsystems.

06 FIDS Solutions

We design and implement integrated public information display systems, using digital screens and signage to provide real-time updates on flight status, arrivals, and departures.

08 Wi-Fi Network Management

We integrate and implement telecommunications systems with specialized wireless internet development (Wi-Fi and Satellite)

- ✓ **Basic Enterprise Wi-Fi:** Centralized management, rapid deployment, customizable guest portal, social media login, and access token generator.
- ✓ **High-Density Wi-Fi:** High performance, rugged equipment, local and cloud-based management. The premier choice for high-interference environments.
- ✓ **Premium Wi-Fi:** Centralized support and cybersecurity protection. We guarantee end-to-end security, advanced encryption, and secure email tunneling.

01 Fleet Management & Control Solutions

We offer advanced fleet management and control systems that enable real-time monitoring of location, performance, and maintenance for individual vehicles or entire fleets. Our solutions optimize routes, improve operational efficiency, and guarantee the safety of both passengers and cargo.

03 Passenger Experience Solutions

We develop user-centric solutions to enhance the passenger experience, offering real-time information, entertainment options, booking systems, and personalized services that make travel more comfortable and efficient.

05 Wi-Fi & Communication Solutions

We provide reliable connectivity and onboard Wi-Fi solutions to enhance the passenger experience and enable effective communication between vehicles, terminals, and control centers, guaranteeing seamless connectivity.

07 Fleet Operation Training & Simulators

Our simulators and advanced training programs provide realistic and effective training for fleet operators, enhancing their skills and preparing them to navigate diverse and complex scenarios.

02 Manufacturing, Supply, and Maintenance of Onboard Equipment & ITS

We provide cutting-edge onboard equipment and Intelligent Transportation Systems (ITS) to enhance transport efficiency and safety. From manufacturing to supply and maintenance, we offer state-of-the-art technology for vehicles and integrated systems that optimize mobility.

04 Modular Centralized Fare Collection Solutions

Our modular centralized fare collection platform simplifies payment management in transit, offering flexible and secure payment methods for both individual users and transport operators, ensuring broad coverage and efficient control.

06 Electric Fleet Infrastructure Solutions

We offer charging infrastructure and management for electric fleets, including smart charging stations and energy management solutions that facilitate the transition toward more sustainable mobility.

Smart Mobility Road Infrastructure

[Conocer más](#)

01 Traffic Management & Road Safety Solutions

We implement innovative solutions for intelligent traffic management and road safety, including speed control systems, vehicle monitoring, incident detection, and data analytics to improve safety on the roads.

03 Supply & Operations for ITS and Tolling Systems

We develop and implement Intelligent Transportation Systems (ITS) and tolling solutions that optimize mobility, reduce congestion, and facilitate electronic toll collection (ETC).

05 Control Center Management Solutions

We provide centralized management and supervision tools for traffic and highway control centers, enabling fast and informed decision-making in response to emergencies or congestion.

07 Road & Tunnel Operations Simulation and Training

Our simulators and advanced training programs provide detailed and realistic training for road and tunnel operators, enhancing their skills and preparing them to handle diverse situations within controlled environments.

02 Access Control & Vehicle Revenue Solutions

We offer efficient access control and vehicle payment systems for tolling and restricted areas, utilizing advanced technology to guarantee fluid and secure traffic management.

04 Road Infrastructure Digitalization Solutions

We implement digitalization solutions for road infrastructure, including mapping, data analytics, 3D modeling, and Geographic Information Systems (GIS) to enhance the planning and management of road networks.

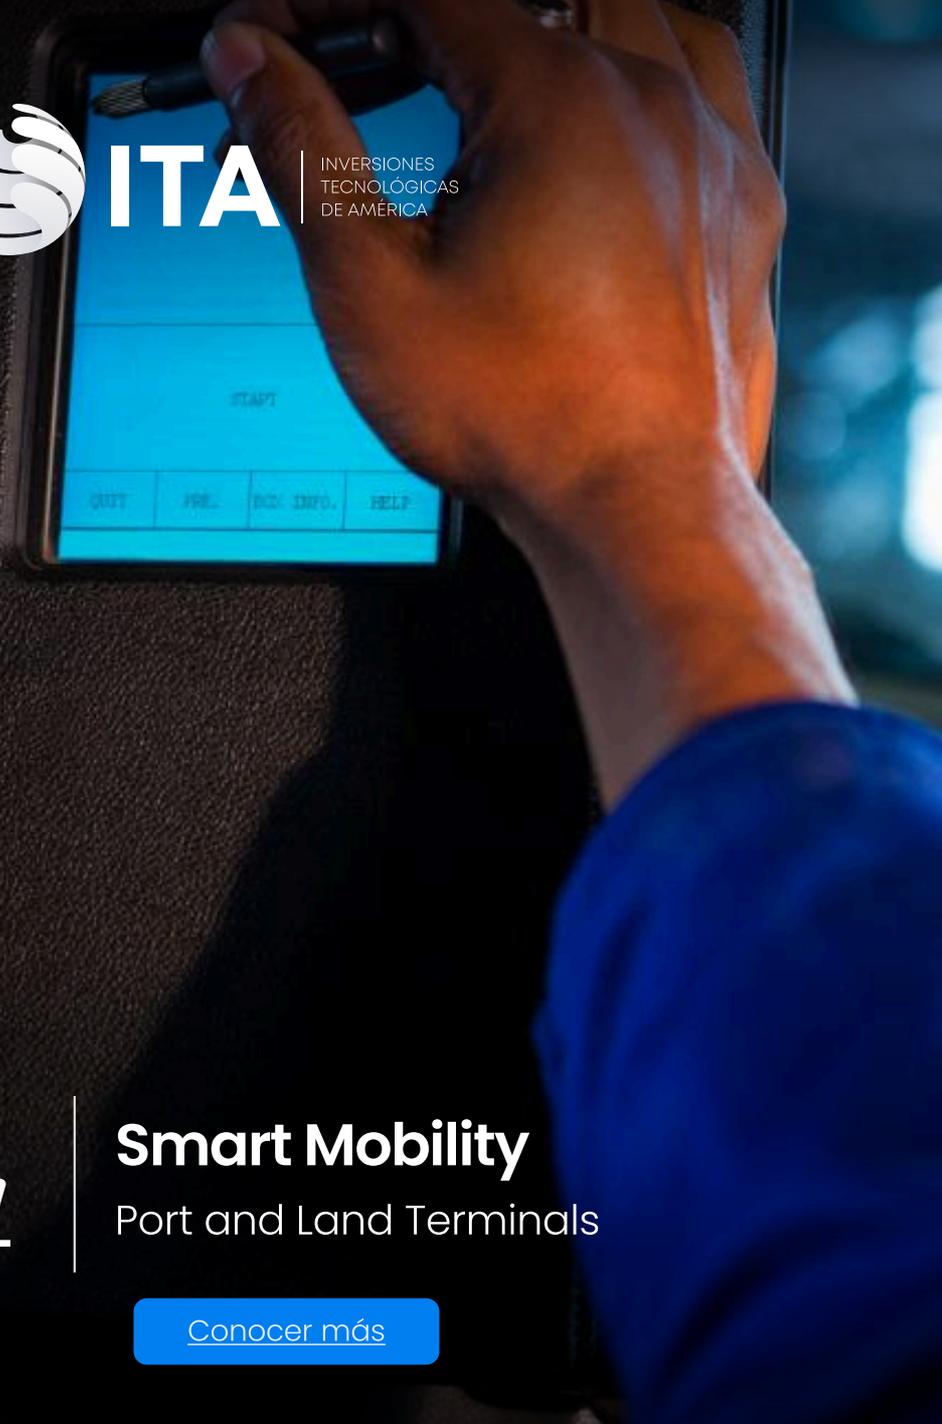

06 Virtual Reality Solutions for Remote Management

We offer Virtual Reality solutions that enable the remote management of road infrastructure, providing interactive visualizations and real-time data for precise and efficient decision-making.

Port and Land Terminals

[Conocer más](#)

01 Logistics Platform Solutions for Terminal Digitalization

We provide comprehensive solutions for the digitalization of port and land terminals, optimizing cargo management, storage, and distribution, while improving operational efficiency and reducing turnaround times.

03 Cargo & Passenger Access Control Solutions

We implement access control and security systems for the efficient and safe management of cargo and passengers at port and land terminals.

02 Terminal Management Solutions

We offer advanced tools for efficient terminal management, including tracking software, inventory management, traffic scheduling, and access control systems.

04 Port & Land Community Systems

We provide comprehensive solutions for the development and management of port and land communities, including infrastructure, services, security, and urban planning.
